

# Project “Circular Chicken” – research questions

- Circular, economic, ecologic and ethologic criteria for practical implication of a circular poultry diet with green waste and/or insects
  - Available green waste products and nutritive value
  - Effect of biorefinery and/or insects on nutritive value of green waste products
  - Effect of circular poultry diet on production performance, health and welfare of broilers and layers
  - Profitability in practice
- 
- Two-years project

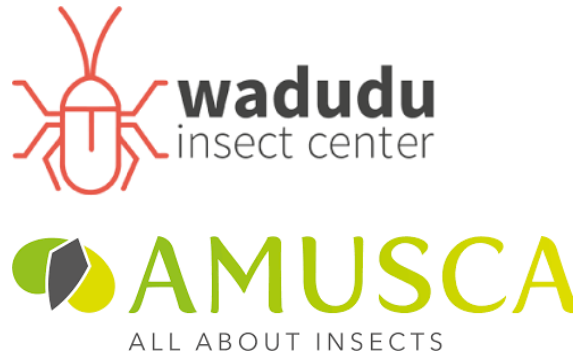

# Project “Circular Chicken”

Poultry farmers

Gielen-Dielissen, Leenders, Agro-Giethoorn

Insect farmers

Knowledge institutes

“Green waste producers”

Feed mill

Nutrient analysis
